The Civil Cemetery

"Buñol cemetery is one of the most diverse, unique and exceptional cemeteries in the entire Valencian Community and Spain, an example of coexistence and respect of a town and its people towards their ancestors".

There are many press articles and digital reports talking about the idiosyncrasy of the inhabitants of Buñol with regard to death, but very little has been written so far about the presence of Masonic symbols on numerous graves from the end of the 19th century to the present.

We find countless symbols and epitaphs related not only to Freemasonry, but also to other currents of secular thought such as republicanism or freethinking.
